

How to fold a prefold?

Newspaper Fold This fold is great for boys or for use at night due to the extra layer of absorbency in the front

1
Fold a small Flap up.

2
Fold in thirds.

3
Spread back wings.

4
Pull sides around & Snappi or pin on.

Jelly Roll Fold This fold is great for liquidy poop and infants but will work great at any age.

1
Roll.

2
Fold.

3
Pull sides around & snappi or pin on.

Pad Fold This fold is the quickest and easiest fold to do. It most resembles a microfiber insert that is found in many one-size diapers.

1
Fold in thirds

2
Lay inside your cover.
No need for a Snappi or pin

Bikini Twist This fold is great for active, mobile babies and toddlers. Trim through the middle.

1
Twisted one end.

2
Pull up.

3
Attach with Snappi or pin.

Angel Wing This is a very basic fold and great for any age.

1
Fold in thirds

2
Fold up front.

3
Spread out back.

4
Pull wings around & Snappi or pin on.

TIPS FOR FOLDING

For A Boy: Folding the front of the diaper down at the front of the diaper doubles up the absorbent layers in their wet zone.

For A Girl: If you use a larger diaper you can lay your diaper in the opposite direction before you start your diaper folding (with the thick middle of the diaper going sideways instead of length wise. This doubles up the absorbent layers in the middle.

For The Super Pooper: Try the News Paper fold with the fold along the back of the diaper. This creates a "poo pocket" on their backside.

For The Super Soaker: Try adding a doubler to your prefold along the soaker zone before you start folding the diaper. See our Nighttime video for more information.

For convenience: Use the Newspaper Fold but don't fold the front until you get the diaper pulled through your baby legs and up to their tummy. As an option, fold the diaper down in the front with the extra on the outside of the front. This can make it easier to determine how much diaper to fold!
